

H2S SHELTER PROTECTION SYSTEM

Offshore

The Uniteam H₂S temporary refugee (TR) shelter system is built upon a barge to operate and save lives in extreme H₂S environments in offshore oil & gas exploration areas. Uniteam has for years designed and built gas tight systems for clients around the world to protect military personnel against NBC attacks and has diverted this experience into fields of proven solutions to suit offshore/onshore operations. Few, if any company in the world, hold our extensive knowledge and experience.

Front-section of an offshore H₂S-TR shelter, Kazakhstan

- Capacity of 500 persons
- DNV (Det Norske Veritas) approved
- A60 fire rated
- Generator operation in EX-enriched atmospheres
- The TR can be built for dual purpose rendering canteen/office/meeting facilities combined with a temporary refugee shelter
- Full pressurization after automatic shutdown
- Complete internal and remote alarming hook-up system

Uniteam China operates world wide with containerized modules and emergency relief equipment.

Unit 1508, the Shanghai Universal Mansion, 168-172 Yu Yuan Rd, 200040, Shanghai, China.

H2S SHELTER PROTECTION SYSTEM

Onshore and mobile solutions

The Uniteam H₂S temporary refugee (TR) shelter system is built to operate and save lives in extreme H₂S environments in onshore oil & gas exploration areas. Uniteam has for years designed and built gas tight systems for clients around the world to protect military personnel against NBC attacks and has diverted this experience into fields of proven solutions to suit offshore/onshore operations. Few, if any, companies in the world hold our extensive knowledge and experience.

H₂S-shelter/ Canteen for 500 persons
Kazakhstan
